CHAPTER I'S NEWSLETTER AUGUST 2015 BOB AND BECKY'S PAGE

How's it going--good??? Well the weather in July definitely made an improvement from previous months. We got lots more riding in the last few weeks. As many of you know, we lost one of our chapter members that helped start the chapter, Dave Martin. Our condolences go out to his wife Ann and the Martin family. We want to thank those who rode with us to Dave's memorial. Dave's bike was parked out in front of the church, looking good, his son, Dan had got it ready and rode it over. We want to thank everyone who came down to our campout. We had a very good turn-out, the weather did finally co-operate with close to 100 people. We are looking forward to next year. We still can't believe the hustle and bustle for a couple of days in the campground that all of a sudden, all leave and it becomes so eery quiet, but then there's next year.

The teddy bear ride went well, we want to THANK all who participated. We know the hospital really treasures the teddy bears they receive. The dinner ride to Mrs. Yoder's, I believe we had 18 in attendance and we want to welcome a new member, Judy Pratt. She rode down on her 1500 trike.-look forward to seeing her at our chapter gatherings, also was good to see Peggy Byler and Chapter B CD's, Randy and Linda Porter.

It looks like the next items on our schedule to be noted is the I-2 Corn Roast on Sunday, August 9th. We will be leaving Ryan's Steak House parking lot at 12:30 for those in the Wooster area and all others at the corn roast.

Other upcoming events:

August 8th Chapter gathering at Ryan's Family Steak House Eat at 5 and gathering at 6
August 9th I-2 Corn Roast Southington Ohio, American Legion Post #751, 3145 Warren Burton Rd. 44470

Obituary for David R. Martin

David R. Martin, age 69, of Wooster, passed away, Wednesday, July 15, 2015 at The Kindred Hospital in Cleveland.

He was born on November 20, 1945 in Wooster to the late Ervin and Edna (Doerschuk) Martin. Growing up on a farm in Sterling, he was a graduate of Smithville High School class of 1963 and was a life member of the East Chippewa Church of the Brethren in Orrville where he had been involved in work, camp and mission projects.

He worked for Rubbermaid Inc. for 35 years before retiring in 2012.

His loves included motorcycling, auctions where he'd buy up bargains and sell; antique collecting, antique tractors/farm machinery, bowling, a collector of knives and arrowheads and photography. He was a member of the GWRRA (Goldwing Road Riders Assoc. Chapt. I);

You Only Hit That Car ...If You Don't Quite Stop In Time
By: James R. Davis

It takes most people about 4.5 seconds to read this sentence. 4.5 seconds is not a lot of time - but it could be the rest of your life. 4.5 seconds is also (not really a coincidence) about how long it SHOULD take you to stop your motorcycle after applying your brakes at 60 MPH!

Stopping a motorcycle as fast as possible requires that you master only a few fundamentals:

Alertness - No matter how fast your reflexes are or how don't see the need to stop, you won't.

Reflexes - First you need time to recognize a threat and decide to react to it, then your fast reflexes take over and make the difference.

Skill - Under-utilizing your brakes is just as dangerous as over-doing it. Let's get a feel for magnitudes.

It usually takes about .7 seconds to recognize a threat.

A person with normal reflexes takes about .3 seconds to start braking from the moment he realizes he has to do so.

Combined, that's about 1 full second from the time a threat presents itself to you and you begin to slow down. At 60 MPH you travel 88 FEET in 1 second! That it takes you about .7 seconds to recognize the threat is a mental reality. But it does not necessarily take .3 seconds to react to it. The simple practice of always covering your front brake can shave a full tenth of a second (1/3!!) of that time away. That's almost 9 FEET!

Assuming you have read the tips on braking methods earlier, you have a good idea about how to use those brakes. Now let me try to give you a sense of magnitude associated with the skill part of braking. Traffic Engineers have some rules-of-thumb they developed over time. They, for example, have found that if the street surface is dry, the average person can safely decelerate an automobile at the rate of 15 feet per second per second (fpsps). That is, an average person can slow down at this rate without any real likelihood that they will lose control in the process. If the surface is wet they assume a deceleration rate of 10 fpsps is safely attainable by almost anyone. Let's assume a wet street surface and that you are moving at 60 MPH. At a 10 fps deceleration rate it will take you 8.8 seconds to stop after you begin applying your brakes. (A total of 9.8 seconds from the time the threat we earlier talked about presents itself.) The distance you would travel before coming to a complete stop is 475 feet. If, however, the road is dry, it would take you only a total of 6.9 seconds to stop, (including the 1 second recognition/reaction delay.) and the distance traveled until you came to rest would be 346 feet. Clearly the more effective your braking is, the less time it takes to stop, and the less distance traveled. I think most of you know that your motorcycles can stop more quickly than can an automobile. Indeed, a professional motorcycle racer can obtain a 1g deceleration rate, or more, on his motorcycle. (1g deceleration is 32 fpsps.) With practice, your braking skills should easily allow you to attain deceleration rates in excess of 20 fpsps. What would that mean in our example threat scenario? It would mean that you could stop your motorcycle in a total of 5.4 seconds (including the 1 second delay.) and your total stopping distance would be only 281.5 feet! By enhancing your braking skills with practice you can shave 64.5 feet and 1.5 seconds off 'normal' results. And you could shave off another nearly 9 feet just by covering your brakes. That brings the distance traveled before stopping down by about 73.5 feet. 73.5 feet is about four car-lengths! The message is clear: You only hit that car if you don't quite stop in time. You might not hit it at all if you cover your brakes and practice your braking skills.

Yes, I'm running behind on the newsletter article but fun time was had by many old and many new friends. We was very fortunate as they've had 26" of rain in the past couple months with the town flooding several times. There was a little rain Sat. night after all festivities were over. In our little camp-site area was represented by Chapter B, I, V, P and even a visiting couple from PA. GREAT NEWS -- Lloyd and Becky Glydewell will be our new Region D directors, looking forward their many new ideas.

We wasn't able to make it back in time for the Teddy Bear ride but think the rain might've held off for them to "getter done". Many things have been happening since our last meeting -- another Benjamin Camp-out was enjoyed. After having breakfast on Sat. morning, many traveled north for Dave Martin's memorial service. Was so wonderful to have had so many Chapter I members, past and present and Goldwing friends in attendance.....we're keeping Ann and the family in our prayers. Prayers also for those also who may have illnesses of which have not been shared.

God Bless -- Nancy Lantz
